

Thom Verhave

August 3, 1929–June 1, 1998

Thom Verhave was a leading figure in the early history of behavior analysis. He was noted for his demonstrations of behavioral control, his research at Eli Lilly on avoidance of electric shock, his later research at Arizona State University and Queens College, and a highly influential book of readings (*The Experimental Analysis of Behavior*). He was a founding member of the Society for Experimental Analysis of Behavior and served on this journal's first editorial board.
